**There is always a bigger
fish.**

Qui-Gon Jinn

Mission

We exploit the full potential of digitization in your industry from the first to the last process step. With young motivated innovators, we systematically help companies make meaningful business decisions.

Vision

We don't do Problems.
We provide solutions to
your challenges.

Business Goals & Objectives

1

Customer satisfactory

It is of the essence that we reach the WOW effect.

2

Innovative solutions for complex challenges

One of the key features we offer is options of solutions, so that our partners have a variety of possibilities to choose from

3

Leading tech company

Being at the top of the game is our main motivation.

1

Deliver on time

In deadlines we trust.

2

One step ahead

We have young team who wants to prove themselves at any given time that they deserve to be where they are.

3

Quality over quantity

Our small but compact team will deliver state of the art solutions, we would rather do something good or nothing at all.

What we do

01

Custom Software

Custom software development is the designing of software applications for a specific user or group of users within an organization.

02

Web Development

Implement beautiful and responsive user interfaces that are highly-interactive and give users a native-like experience.

03

Extended Reality

Extended Reality (XR) is an umbrella term encapsulating Augmented Reality (AR), Virtual Reality (VR), Mixed Reality (MR), and everything in between. Although AR and VR offer a wide range of revolutionary experiences, the same underlying technologies are powering XR.

What we do

04

Motion Graphics

Motion graphics are a way to communicate with the viewer, and add depth to the story. Together with music and effective copy, they can give us a message. We use them to create ads, title sequences for movies and many other things.

05

Digital Marketing

Almost anything can be a digital marketing asset. It simply needs to be a marketing tool you use online. Here are just a few examples of our services in digital marketing :

- Your website
- Branded assets (logos, icons, acronyms, etc)
- Video content (video ads, product demos, etc)
- Images (infographics, product shots, company photos, etc)
- Written content (blog posts, eBooks, product descriptions, testimonials, etc)
- Online products or tools (SaaS, calculators, interactive content, etc)
- Reviews
- Social media pages

06

Digitalise Business processes

Digitization often enables a process to be fundamentally reconfigured; for example, combining automated decision making with self-service can eliminate manual processes. Successful digitization efforts start by designing the future state for each process without regard for current constraints—say, shortening a process turnaround time from days to minutes. Once a compelling future state has been described, constraints (for instance, legally required checks) can be reintroduced. Companies should not hesitate to challenge each constraint. Many are corporate myths that can be quickly resolved through discussions with customers or regulators.

What we do

07

Branding

We embrace ideas and are curious.
We use our skills of analysis and insight to uncover opportunity.
We are flexible in our approach and value diversity of opinions, ideas, skills and perspectives.

08

UI/UX

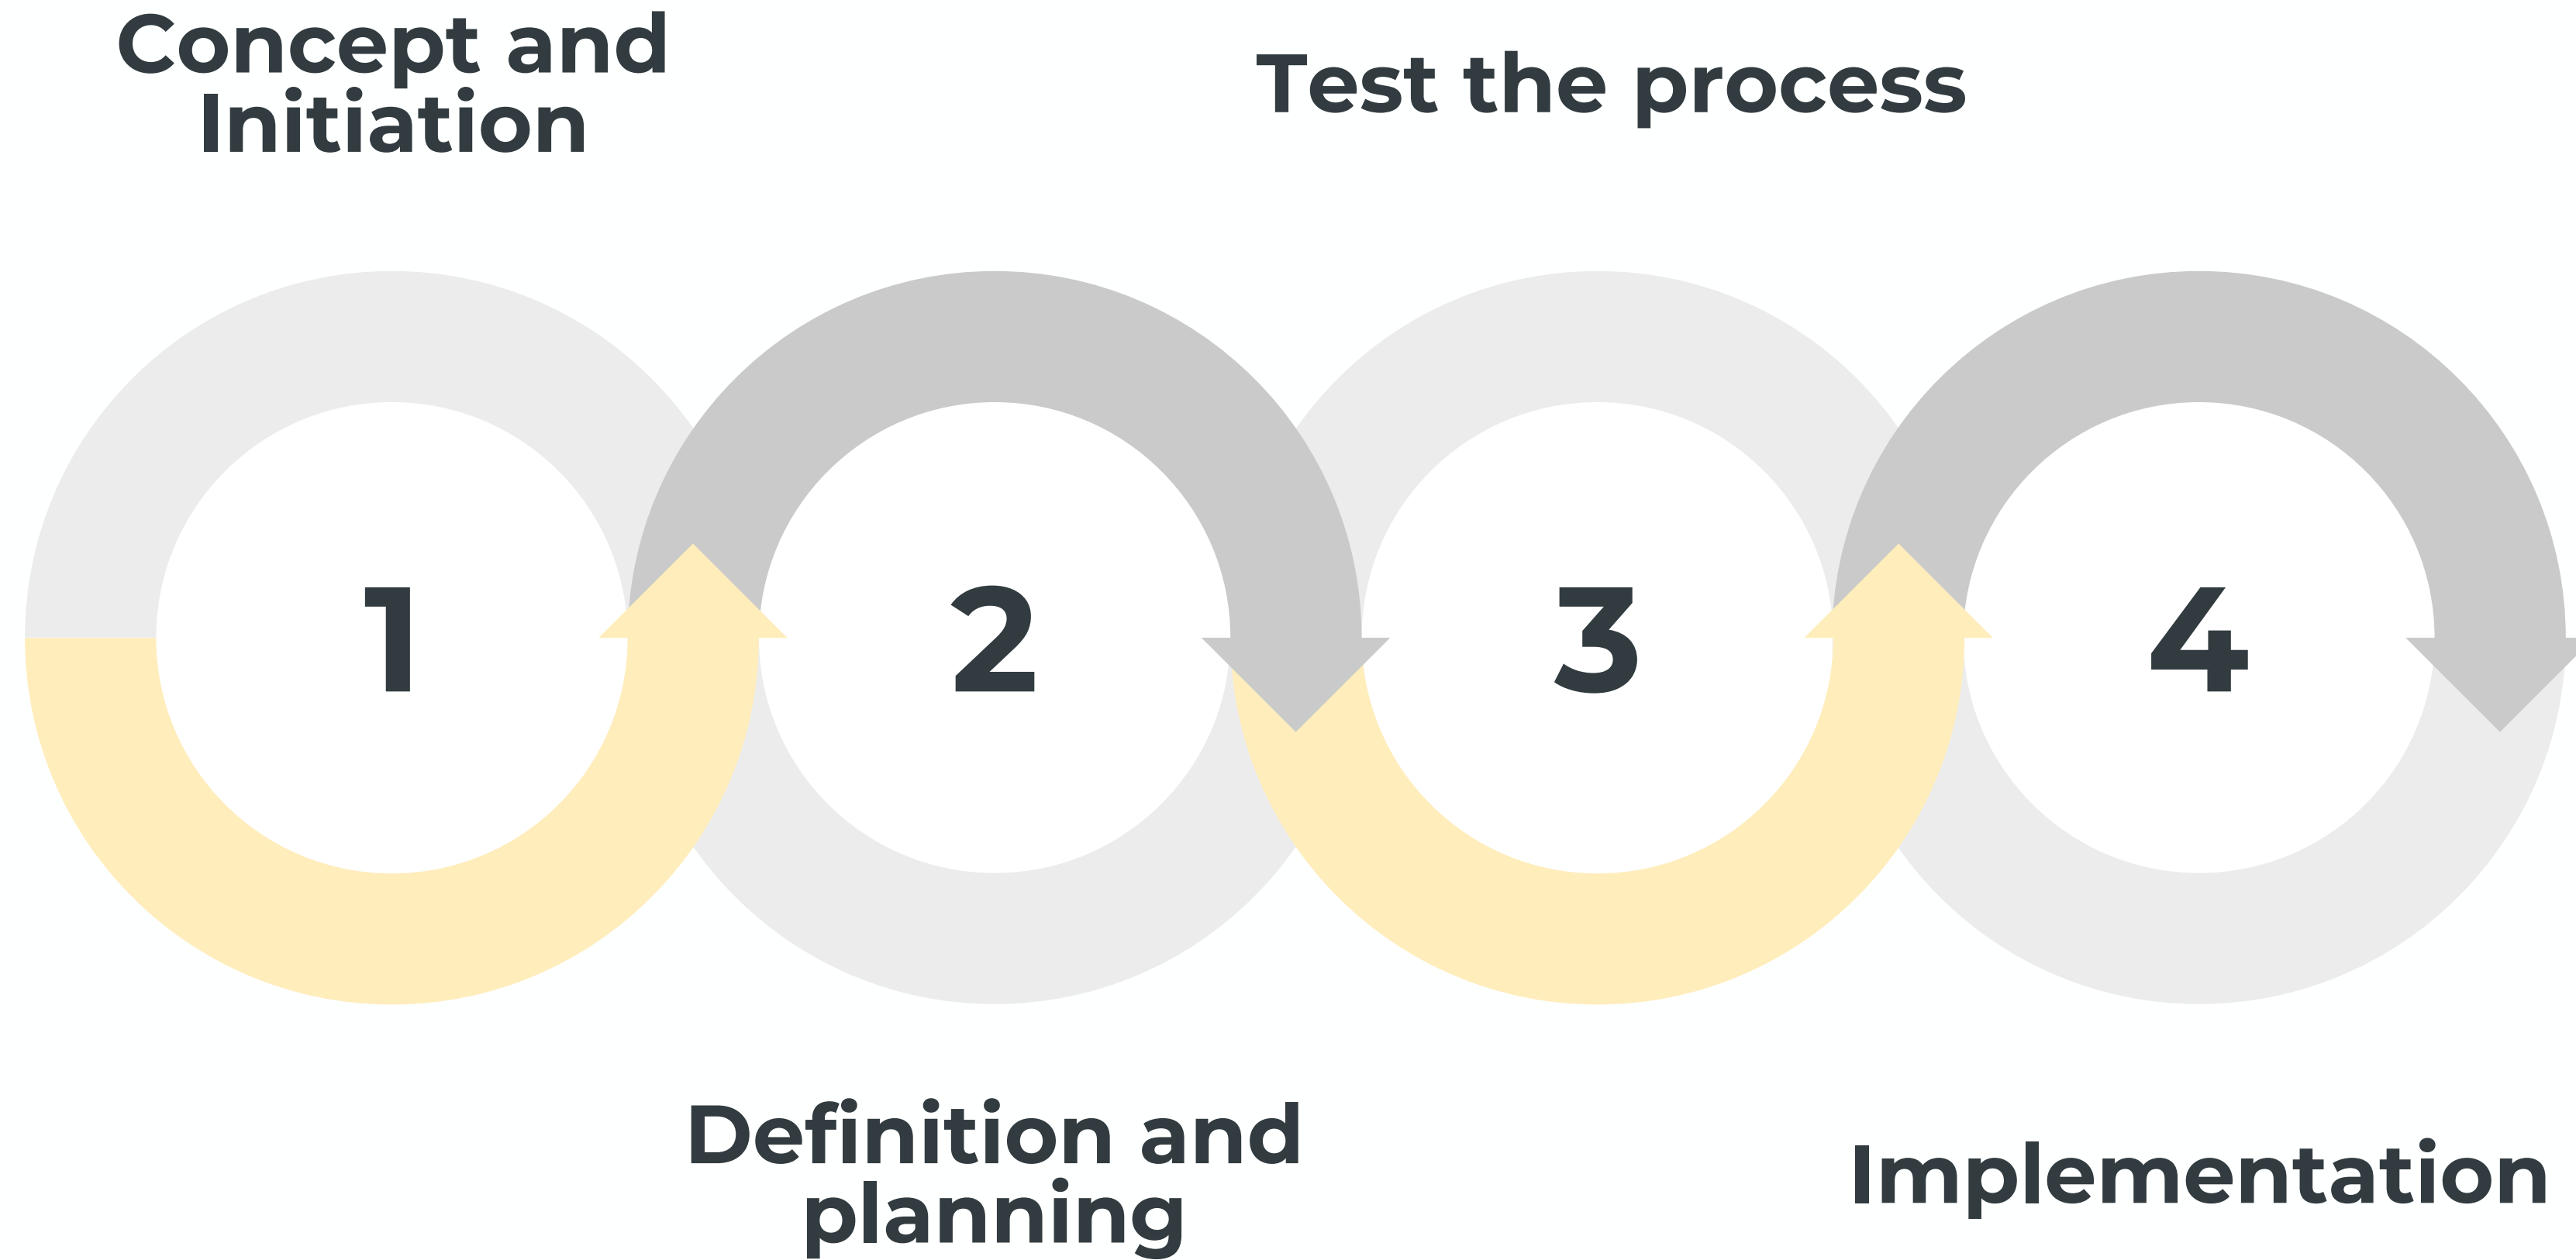

Design of a user interface and experience, designed for mobile devices, desktop screens, and more

09

Mobile App Development

Using solid expertise in mobile apps development, our team will help you create practical and seamless experiences on any device and get the best of mobile technology for your business.

Klaviyo

Epsilon

Description:

Epsilon enables your sales team to see inventory in real time, search customer records, and complete orders for a simpler and more efficient sales process. With important data like customer records, sales order, line items, invoices, payment records, inventory availability, and price levels available at their fingertips, your sales reps are free to provide premier customer service no matter where they are.

Our Products

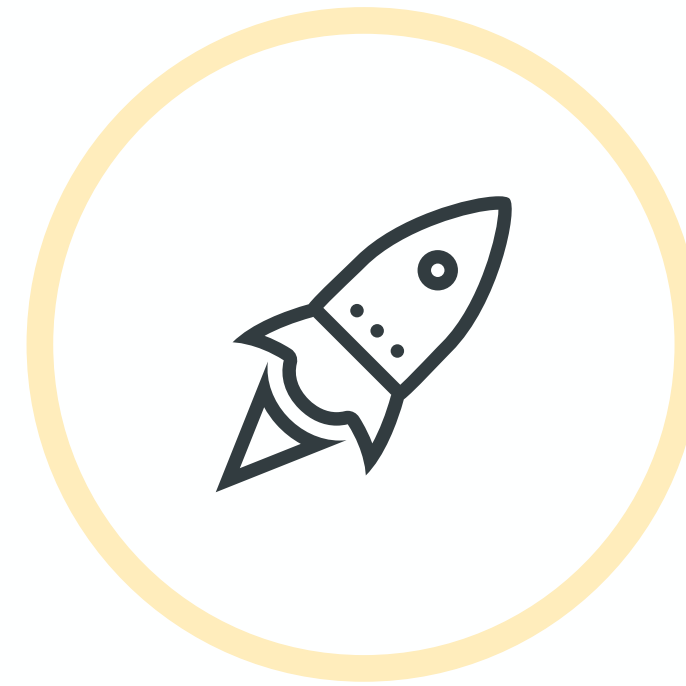

Webuild

Description:

WeBuild is a professional Theme, It is a complete solution for both Employers and Candidates offering different job layouts. It has all required tools and modules to create super fast responsive website. Great variety of numerous layouts and styles allows to create different structures and satisfies any specific requirements.

WeBuild will help you draw attention of visitors at first sight.

Architectural visualization

We create high-quality 3D Architectural Visualizations and CGI for Architects, Interior Designers and Property Developers.

We like to think big, to achieve beautiful things. We start each new project by getting to know you, What's your project about and where you want it to take you. So we work collaboratively understanding your personalized style and the story within. This makes us constantly deliver beautifully crafted CGI imagery.

Simon Greussing

Bee Greenworld

“I am working with SDS together since 12 months and I am very satisfied with the work they do. They helped us building our websites and also programming VR Solutions what they are doing great!”

Konstantin Ladwein

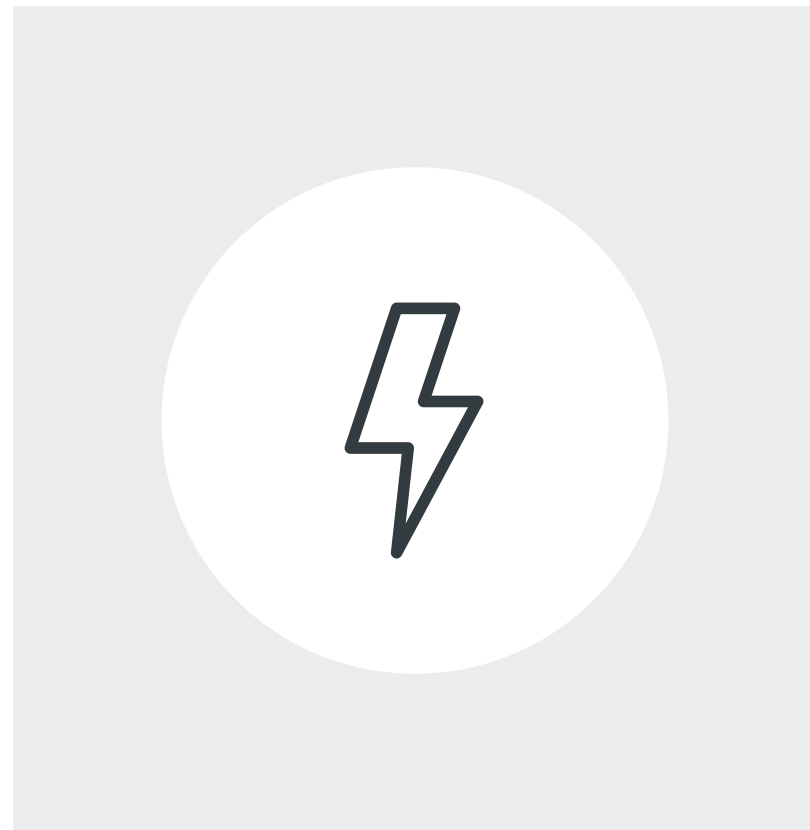

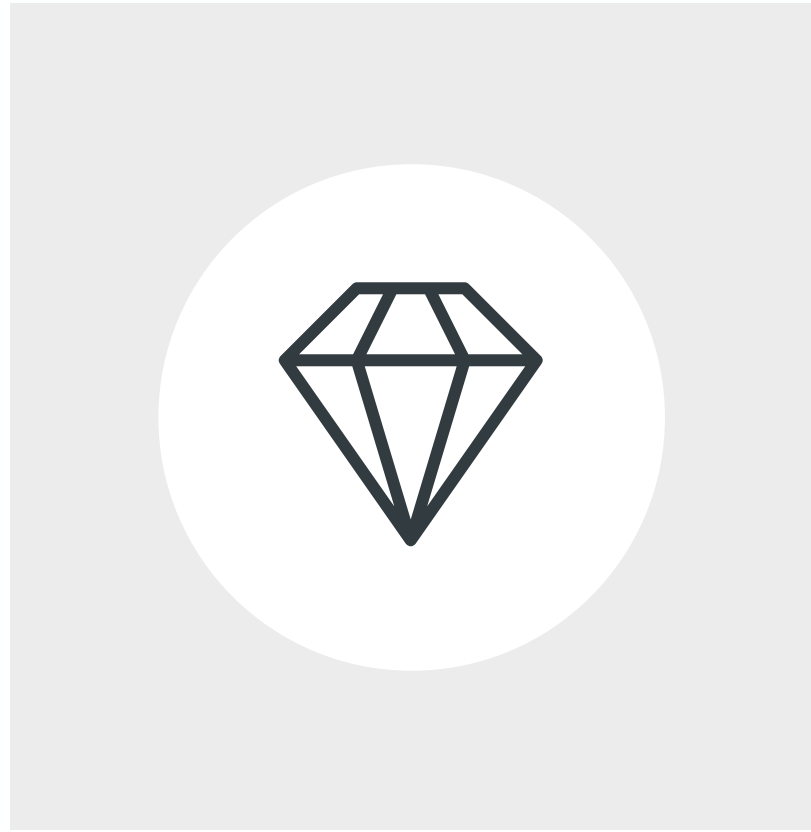

Fittaste GmbH

“Software Development Solution hatte die Aufgabe, die Schnittstelle von klaviyo zu JTL Shop umzusetzen. Das wurde zur vollsten Zufriedenheit erfüllt und wir sind dankbar für eine zeitnahe Umsetzung”

Thomas Grabner

Thomas Grabner

“Arbios and his team impress me with every project more and more. For me as a non programmer I love the way of communication and the fast solutions SDS can provide us. Compared to the other companies we have used in the past, SDS has given us the best ROI overall.”

**Sustainability.
Innovative. Future.**
