Portfolio

BigFish
Field

CRM

A brand-new European CRM platform developed for field sales representatives and their managers. Working with accounts&organizations, tracking sales, analytics and many-many more.

Our client was in a desperate situation because of their previous tech partners. Their CRM was in a critical state and the release deadline was close. MasterDynamix team focused on **successful release and onboarding of major CRM clients**. The product is still evolving

Portfolio

AgentRisk View

Insurance & InsurTech

A platform designed for insurance agents who need to get the structured report with the information about hazards for any US property. Enter the address and get the report - as simple as that!

MasterDynamix team helped our client to build the platform from scratch and onboard **hundreds of paying clients** after the release. The product is still growing
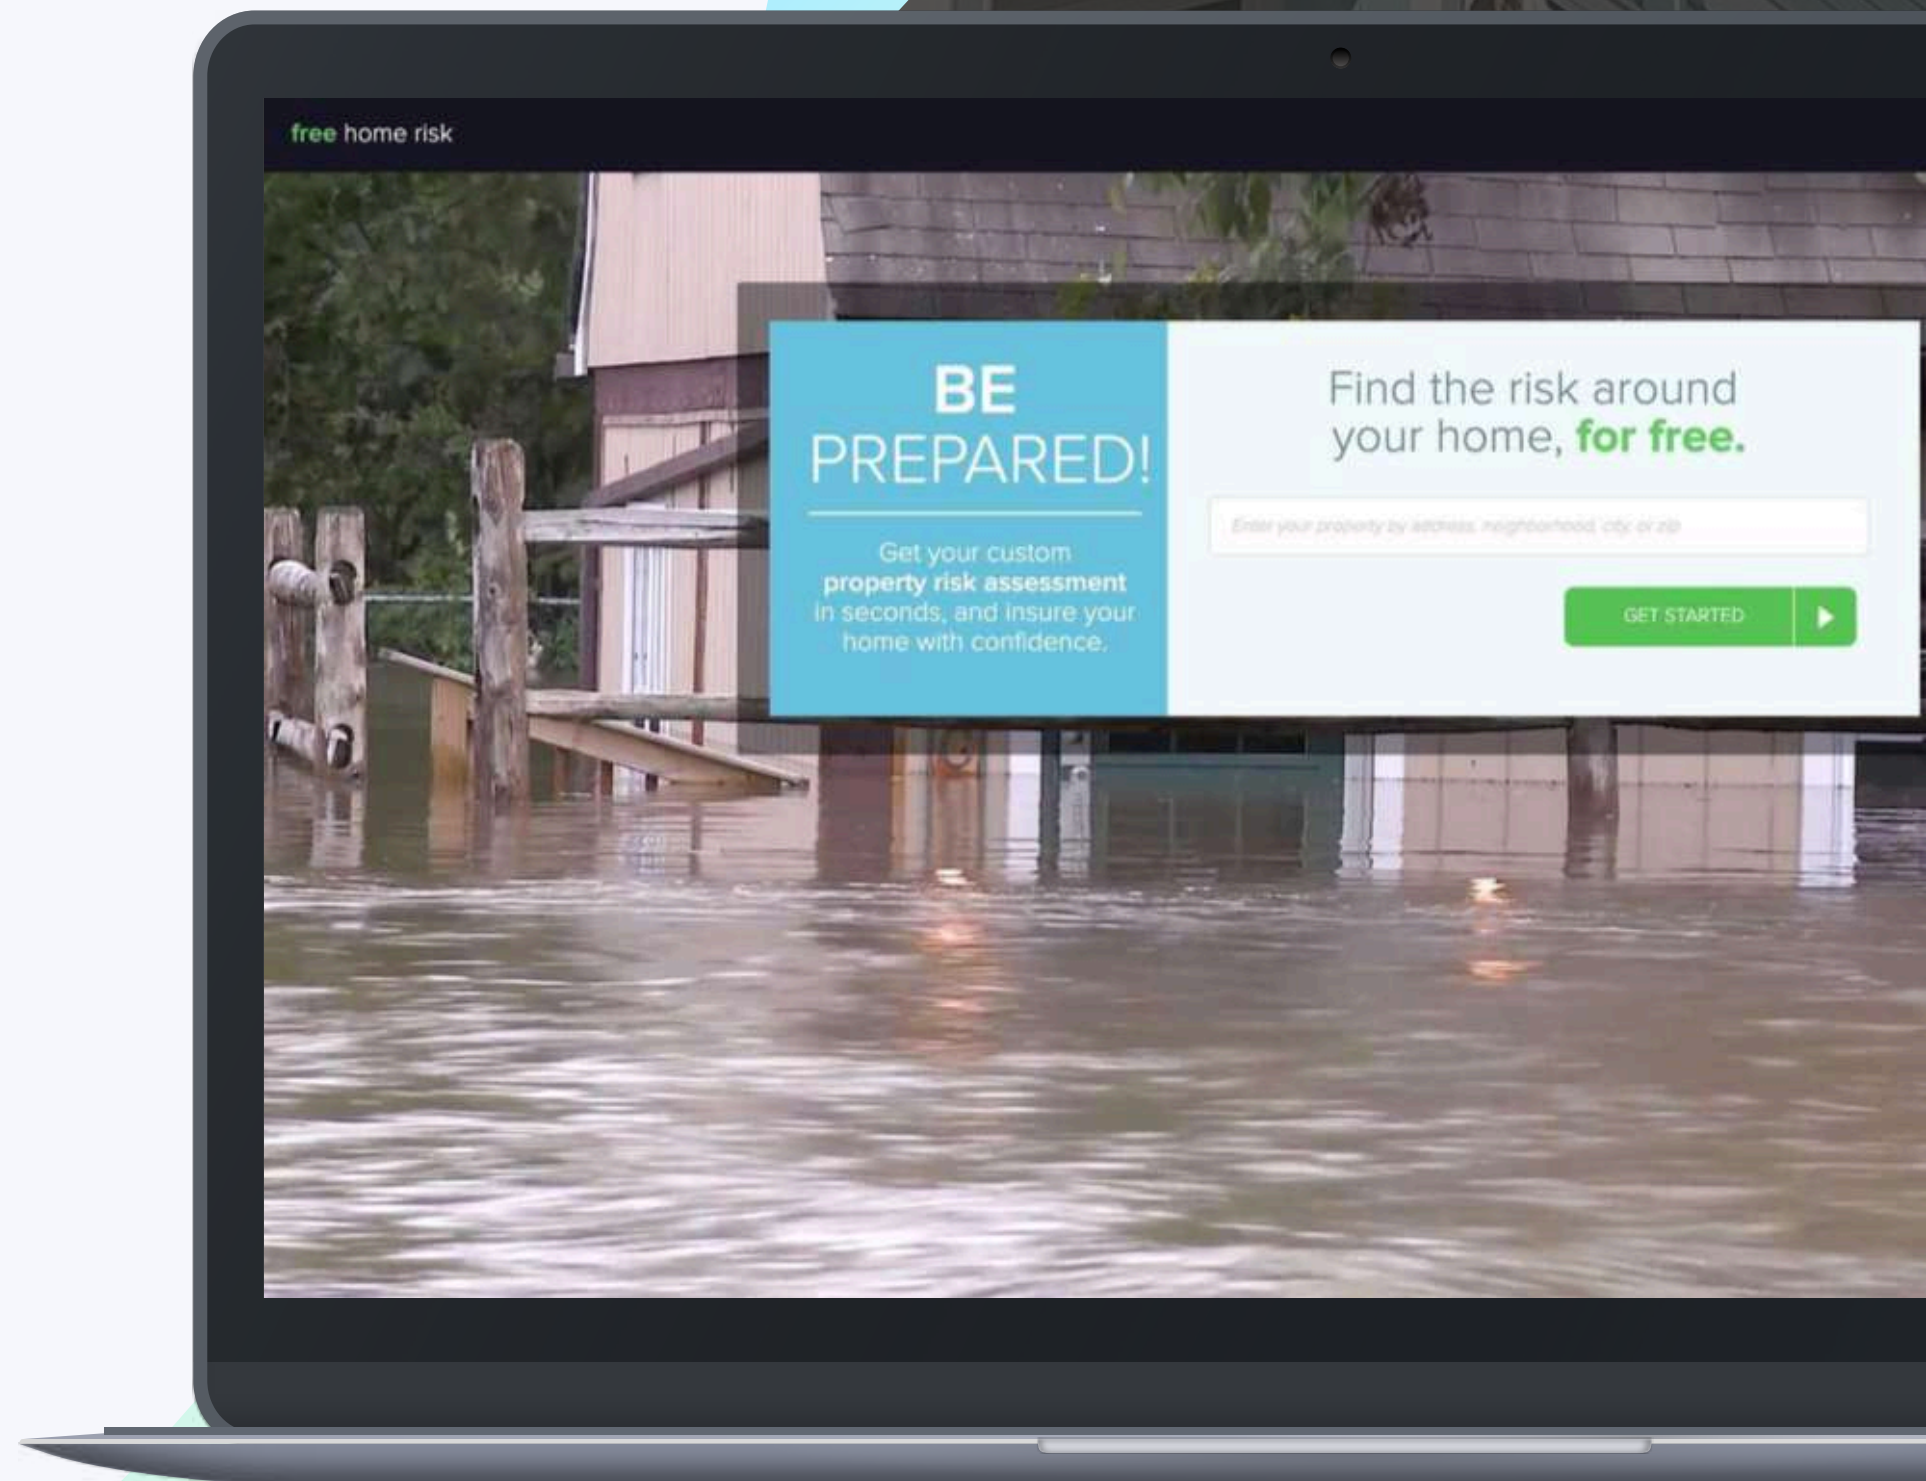

Portfolio

FreeHome Risk

Insurance & InsurTech

The service allows any user to get the property characteristics and risks/hazards classification for any address in the US for free. Corporate clients have a privilege to use the RESTful API and get over 70 different parameters and classifications for any particular property in the US.

With the MasterDynamix team's technical help, the annual revenue of the HazardHub company **grew steadily from $0 to $2M+**

free home risk

BE PREPARED!

Get your custom **property risk assessment** in seconds, and insure your home with confidence.

Find the risk around your home, **for free.**

Enter your property by address, neighborhood, city or zip
