WHY YOU SHOULD WORK WITH US?

1 **Fluent in English** - we guarantee effortless and fruitful project communication as all of our team members are fluent speakers and communicators in English.

2 **Time difference** - Bulgaria is only one hour ahead of Central European Time, which is essential for timely and efficient communication.

3 **Membership in strategic organisations** - Bulgaria is a member of both the EU Union and NATO, which provides a stable and secure business environment for the country.

4 **Business ethics** - at Bulcode, we believe in conducting business with integrity and transparency, which is essential for building long-term partnerships.

5 **Cost-effectiveness** - low taxes in Bulgaria, no VAT for EU Union members, and efficient operations mean that our clients can reduce costs without sacrificing quality.

6 **Data privacy compliance** - at Bulcode, we take data privacy seriously and comply with all relevant regulations. This ensures that our client's data is kept safe and secure.

7 **Sustainable strategy** - Bulcode is committed to environmentally friendly practices such as lowering carbon emissions and reducing waste.

TESTIMONIALS

Erad

FinTech Startup Platform

"Bulcode is a team of doers. They don't just try to sell us beautiful things; they're technical experts who know their stuff and deliver on it. The team has really familiarized themselves with our product, and they do what it takes to make it successful. Bulcode wants us to succeed; they were happy to see us get our first customers."

Fraport Bulgaria

Operator of Burgas (BOJ) and Varna (VAR) airports

"The individual approach, timely deliveries and precise documentation of the developments are a small part of the reasons for continuing the active partnership with Bulcode 2016 Ltd. It is our privilege and obligation to recommend the team of Bulcode 2016 Ltd. as extremely competent, reliable and responsible in the implementation of the commitments."

ViV Isomatik

Electrical Distribution & Control E-Commerce Company

"The work done by Bulcode to create the Viv Isomatic website was exceptional. Problems that arose were dealt with quickly and professionally and the team is very cooperative. Their suggestions to improve efficiency and streamline the work were very helpful. The follow-up support of the e-shop is also at a very good level."

Zaharó

Confectionery E-Commerce Company

"We are extremely happy with the services provided by Bulcode. They always respond in a timely manner and manage to fulfil on schedule and with high-quality tasks that we have set or to fix issues that have arisen. "

CUSTOMER PROCESS

01 Initial Meeting

We will meet with you, along with a manager and a business analyst, to get to know each other, discuss preferred work models, and see how we can collaborate.

03 Estimates

Involving a technical lead and business analyst we will estimate the needed effort for the project and present you with detailed documentation.

05 Confirmation

You should review and confirm the proposed plan and estimates.

1 2 3 4 5 6

You will send us your requirements for us to review. Once everything has been checked, we will hold a few meetings to clarify any challenges.

02 Requirements

Once estimates are finalized we will propose a team that will work on the project and a timeline for the delivery.

04 Offer

Our design team will analyze your business ' needs, requirements, and potential customers before creating a design based on what they discover.

06 Design

bulcode

CUSTOMER PROCESS

07 Development

When the designs are approved, we will move into the project's development phase, where we will use an agile workflow.

7

08 Testing

The project will be tested by a team of QA experts. After confirming that all is working as expected, you should double-check the work delivered.

8

09 Documentation

All project documentation that is created throughout the project will be provided to you. Trainings on how to work with the software will be done if needed.

9

10 Delivery

The project team builds, tests, implements and transfers the project's product, service or result to production environment.

10

11 SLA

We are always aiming at long-term partnerships with our clients, so after the delivery of the project we will continue to support and maintain the project until you need us to.

11

bulcode

TEAM PROCESS

01

Ideation

We will plan and envision your project. Define the business scope for each idea, develop your product backlog, and delineate your sprints.

1

2

02

Inception

Once we determine that your project is viable, we will create sprint teams and assign their respective tasks. Each team will be given a set of goals and a timeframe to complete them.

03

Iteration

With the project requirements set and working environments prepared, the sprint teams can now get down to business. The team starts working on the first iteration and tackles the product backlog items.

3

4

04

Release

After an iteration, the product is released for you to give your feedback. All is incorporated into the development then tested again before the next sprint.

05

Production

Once all testing and documentation are done, the product will be passed into the production phase. At this stage, our team ensures the successful launch of the product and provides support for its release.

5

6

06

Retirement

The agile workflow process ends with the successful development of the product.

PROJECT BRIEF

The Tonhalle, a former planetarium on Düsseldorf's Rhine, is Germany's most beautiful concert hall. Over 450 concerts by the Düsseldorf Symphony Orchestra and other famous artists draw 300,000 spectators annually.

KEY CHALLENGES

- Legacy content was imported from the old system using the Migrate API.
- Third-party providers were connected via SOAP-API, among other things.
- Under the hood, professional caching works in conjunction with the decoupled system.

KEY ACHIEVEMENTS

- A modern headless Drupal, which connects and integrates third-party systems via various interfaces
- AI-supported image generation, which supports the editors in their daily work
- Modern search services and real-time segmentation of events that filter desired content.
- A React-based frontend that offers the visitor a pleasant user experience.
- The project was named the Splash Awards Deutschland & Österreich winner in the category of e-commerce for the Second Best Drupal Project in Germany and Austria in 2022.

PROJECT BRIEF

LuxairTours is Luxair's vacations booking service. It offers package tours, last-minute vacations, last-minute hotel bookings, flight and hotel reservations, the best bargains on travel-related goods and services, and a travel protection program.

KEY CHALLENGES

- No unified development and testing environment
- Complicated codebase maintenance
- Lack of content management workflows
- Severe content deployment process
- Outdated CMS
- Poor website performance

KEY ACHIEVEMENTS

- OS independent Docker-based LOCAL environment
- Drupal 8 to 9 migration
- Implementation of Content scheduling and publishing workflows
- RootFi integration for loan management system (LMS)
- Isolation of the content management instance from the PROD environment
- Outstanding performance reached by serving CDN-stored static pages
